PART 3

Instructions: For these questions we will ask you to tell us how confident you are that you can do things related to HIV using this response scale ranging from 0 ("cannot do at all") to 10 ("certain can do"). Treatment can involve different things for different people. Sometimes, this might refer to taking medications, and other times it could refer to other things that you do to deal with HIV such as diet and exercise or taking vitamins. So, in these questions, when we ask you about your "treatment" or your "treatment plan," We are talking not only about any medications that you might be taking for HIV, but also other things that make up your self-care. (The term "clinic" may be replaced by "doctor's office" if you do not receive care in clinic settings.)

Please indicate on a scale from 0 to 10 (see scale below) how confident you are that you can complete the following activities related to your HIV treatment.

Cannot Do At All *Moderately Can Do* *Completely Certain Can Do*
00 01 02 03 04 05 06 07 08 09 10

Please indicate your response by writing down which of the numbers corresponds to it.

How confident are you that you can:

Rating

1. Stick to your treatment plan even when side effects begin to interfere with daily activities?	
2. Integrate your treatment into your daily routine? (Make your treatment part of your daily routine)	
3. Integrate your treatment into (Make your treatment part of) your daily routine even if it means taking medication or doing other things in front of people who don't know you are HIV-infected?	
4. Stick to your treatment schedule even when your daily routine is disrupted (interrupted)?	
5. Stick to your treatment schedule when you aren't feeling well?	
6. Stick to your treatment schedule when it means changing your eating habits?	
7. Continue with your treatment even if doing so interferes with (disturbs) your daily activities?	
8. Continue with the treatment plan your physician prescribed even if your T-cells drop significantly in the next three months?	
9. Continue with your treatment even when you are feeling discouraged about your health?	
10. Continue with your treatment even when getting to your clinic appointments is a major hassle (problem)?	
11. Continue with your treatment even when people close to you tell you that they don't think that it is doing any good?	
12. Get something positive out of your participation in treatment, even if the medication you are taking does not improve your health?

PART 7

Instructions: These items deal with ways you've been coping with the stress in your life since you found out you were HIV Positive. There are many ways to try to deal with problems. These items ask what you've been doing to cope. Obviously, different people deal with things in different ways, but we are interested in how you've tried to deal with it.

Each item says something about a particular way of coping. We want to know to what extent you've been doing what the item says i.e. how much or how frequently. Don't answer on the basis of whether it seems to be working or not—just whether or not you're doing it. Try to rate each item separately in your mind from the others. Make your answers as true FOR YOU as you can

Use these response choices: I haven't been doing this at all (1), I've been doing this a little bit (2), I've been doing this a medium amount (3), or I've been doing this a lot (4).

Please indicate your response by circling the corresponding number.

How much or how frequently do you do the following
